- Can analyze, design and implement database structures in Ruby on Rails
- Oriented on creating clean code
- RESTful API's

PERSONAL PROFILE

Entry level in Ruby on Rails and JavaScript based programming and a background in buying. Possess skills in logic based problem solving, and interpersonal skills that help tech companies thrive in efficiency and teamwork.

TECHNICAL PROJECTS

KEYBOARD WARRIOR
A typing game where the user types lyrics of a song of their choice.

- Used React.js with hooks to build application.
- Created the whole application using strictly functional components.
- Implemented dynamic CSS to toggle in between light and dark mode.
- Built project to teach myself how to use Hooks, as well as implement DRY code.

IGG'S PHOTO SHOP
An online mock Photo Shop where a user donates money instead of purchasing photos.

- Used jwt tokens as well as b–crypt to secure a user's profile, as well as storing it in localStorage to retain user information throughout refreshes.
- Implemented React Redux with Hooks and functional components to give the application better performance.
- Incorporated download functionality so a user has an option to do so.
- Incorporated dynamic CSS to give the application a higher–end look and feel.
- User information stored in AWS cloud.

RELEVANT EXPERIENCE

FREELANCE:

BUCKLEYS CAKES (01/14/21 – 01/27/21)
Created a website for a baker. The website showcases products that she chooses, includes an about tab, as well as an order tab that sends all orders to her business email.

- Utilized CSS/React design system to that the client's website has an incredibly modern look.
- Incorporated dynamic multi–image–carousel to give client the ability to upload as many photos as desired, carousel is also responsive to users viewport.
- Created a Flickr account for client to use as a substitute backend. Website queries Flickr account and pulls all photos within the account, this give the client a user friendly CRUD environment.
- Integrated Email.js so orders that are filled within the website are sent to the clients business email.

OPEN SOURCE (12/15/2020 – CURRENT)
Currently contributing to companies, and projects by fixing bugs, and migrating to new technologies.
